

ABSTRACT

To provide a fluorine-containing resin powder coating composition giving a fluorine-containing resin coating film having a high  
5   whiteness, and various articles having on an outer surface thereof a  
coating film which has a high whiteness and can be produced by  
applying the fluorine-containing resin powder coating composition.  
The fluorine-containing resin powder coating composition is subjected  
to baking at 300°C or more, and the fluorine-containing resin  
10   composition for forming the coating film comprises surface-treated rutile  
titanium oxide particles as a whitening agent.
